RESEARCH PROFILE

B.Tech (CSE) student with research experience in spatial computing, AR/VR systems, and applied machine learning. Contributed to lab research in 3D environments and spatial interaction design, with hands-on prototyping and literature survey work. Passionate about advancing human-computer interaction through immersive technologies, with practical programming experience across Python, C#, Java, and real-time simulation tools.

EDUCATION

B.Tech – Computer Science & Engineering Geethanjali College of Engineering & Technology, JNTU Hyderabad GPA: 8.49 (Current) Year 1: 9.0 Year 2: 7.83 Year 3: 8.825	2023 – 2027
Intermediate (MPC) Vision 40, Hyderabad — SSC Board 97.3%	2020 – 2022
10th Standard Kendriya Vidyalaya Tirumalagiri — CBSE 94%	2020

RESEARCH EXPERIENCE

Research Assistant AR/VR Research Lab College Research Lab Hyderabad	Ongoing
- Conducted literature survey on spatial computing and 3D environment design, reviewing state-of-the-art interaction paradigms for immersive systems. - Built and tested prototype systems exploring spatial interaction; contributed findings to an internal lab report on 3D environment design and usability. - Collaborated with lab members to evaluate prototype performance and iterate on design decisions based on empirical observations.	
Student Intern (Research & Engineering) National Remote Sensing Centre, ISRO Hyderabad (On-site)	Jan 2026 – Mar 2026
- Built a Customer Segmentation ML Model (Python) on real datasets, applying classification and cluster analysis techniques to derive actionable insights from remote sensing data. - Maintained and organised large-scale data records; managed documentation and formatted model outputs for internal reporting.	

PROJECTS

GSLV VR Launch Experience Vikram Sarabhai Space Centre, ISRO Blender, Unity 3D, C# Formally presented to VSSC/ISRO team	2026
Designed and developed an interactive VR simulation translating real GSLV launch telemetry and aerospace data into an immersive 3D experience.	

- Presented the working demo to the VSSC/ISRO team; received formal feedback and iterated on spatial design and performance optimisation.

Real-Time Voice Translator | [Independent](#)

2025

Python, SpeechRecognition, GoogleTranslator API, gTTS, Multithreading

- Built a real-time multilingual speech translation system using multithreading for low-latency audio processing and cross-language output synthesis.

File Encryption & Decryption Tool | [Supraja Technologies Internship](#)

Aug 2025

Python | Cybersecurity & Systems

- Developed a full-featured encryption tool supporting files, images, and text with complete decryption capability; final project of a cybersecurity internship.

Freelance Web Developer | [Krisintek \(krisintek.com\)](#)

Nov 2025

HTML, CSS, JavaScript | Remote (Paid)

- Independently designed and delivered a production website for an IT consulting firm, managing client communication, requirements gathering, and deployment.

TECHNICAL SKILLS

Research Areas: Human-Computer Interaction, Spatial Computing, AR/VR Systems, Applied ML

Programming: Python, C, Java, SQL, C#, JavaScript

Tools & Frameworks: Unity 3D, Blender, Three.js, MediaPipe, scikit-learn

Productivity: MS Office (Word, Excel), Google Workspace (Sheets, Docs)

Languages: English (fluent), Telugu (native), Hindi (fluent), German (beginner)

LEADERSHIP & ACTIVITIES

- PR & Social Media Head — The GameSmiths
- Team Leader, PR & Social Media — National Entrepreneurship Network
- Founder & Head — Maya, The Music Club
